

Enterprise AI Professional Level

Leading AI Adoption Across the Enterprise

Strategise • Govern
Scale With Confidence

Audience

Getting value from AI at scale takes more than tools. It takes strategy, governance, the right use cases and people ready to change. This programme prepares leaders and specialists to plan, govern and scale AI across their organisation.

Ideal for:

- Senior Managers & Heads of Department
- Digital Transformation & Innovation Leads
- IT, Data & Technology Managers
- Risk, Compliance & Governance Professionals
- PMO & Strategy Professionals
- Graduates of Applied AI (or equivalent)

Course Description

Enterprise AI is a four-day expert program and the capstone of AVA's AI certification pathway. Participants learn to build an AI strategy and business case, select and prioritize high-value use cases, set up AI governance, risk and data protection controls, AI agents and end-to-end automated workflows, and lead adoption across teams. Each participant leaves with a 90-day AI implementation roadmap for their organization.

Course Outline

- Module 1: AI Strategy, Business Case & ROI
- Module 2: Use Case Discovery & Prioritisation
- Module 3: AI Governance, Risk, Ethics & Data Protection
- Module 4: AI Agents & End-to-End Workflow Automation
- Module 5: Enterprise AI Platforms, Integration & Vendor Selection
- Module 6: Leading AI Change Management & Workforce Upskilling
- Module 7: Capstone: 90-Day AI Implementation Roadmap

Training Details

Duration: 4 Days

Training Fee: N200,000 (excluding tax)
