

**Tech4NonDev
Internship Only Program**

Close the Experience Gap With Real Tech Project Work

Real Projects • Real Tools
Real Experience

Audience

Many people trained for tech roles keep hearing the same answer: you need experience. The Tech4NonDev Internship gives you that experience by placing you on a real project team, using the tools and processes employers expect, with mentors guiding you to job readiness.

Ideal for:

- Graduates of Tech4NonDev or Similar Training
- Aspiring Product Managers & Business Analysts
- Aspiring QA Testers & Scrum Masters
- Aspiring Project Managers
- Career Changers Needing Verifiable Experience
- Africans in the diaspora moving into tech careers

Course Description

The Tech4NonDev Internship is the hands-on phase of AVA's Tech4NonDev Career Transition Program, offered on its own for participants. Interns join project teams in one of five tracks: Product Management, Business Analysis, Quality Assurance, Scrum Master or Project Management. Teams deliver a real project using Generative AI, JIRA, Trello, Slack, MS Project, MS Visio and Azure, with weekly presentations, demos and a final demo to external sponsors, and close with interview preparation.

Course Outline

- Module 1: Onboarding, Team Formation & Track Assignment
- Module 2: Project Initiation, Requirements & Backlog Creation
- Module 3: Agile Delivery: Sprints, Stand-ups & JIRA / Trello Workflows
- Module 4: Working with Generative AI, Slack, MS Project, Visio & Azure
- Module 5: Weekly Group Presentations & Mentor Reviews
- Module 6: Product Demos & Final Demo to External Sponsors
- Module 7: Project Closure, CV Update & Interview Preparation

Training Details
