

Agile Project Management Training Brochure

Empowering Agile Delivery Professionals

Adapt Fast • Deliver Value • Lead Change

Audience

In today's fast-changing digital and business environment, organizations need professionals who can manage projects with flexibility, speed, and customer focus. Agile Project Management equips professionals with the skills to lead adaptive projects, manage change, and deliver continuous value.

Ideal for:

- Project Managers
- Scrum Masters
- Product Owners
- Team Leads and Supervisors
- Business Analysts
- Product Managers
- Digital transformation teams
- Entrepreneurs and startup founders

Course Description

The Agile Project Management Training Program is designed to equip participants with modern Agile principles, frameworks, and tools for managing projects in dynamic environments. Participants learn how to manage uncertainty, lead cross-functional teams, and deliver customer-focused solutions.

This program integrates Agile, Scrum, Kanban, and hybrid delivery models for real-world project environments.

Course Overview

Participants gain practical understanding of Agile values, principles, and practices, and how to apply them to real projects. The training focuses on mindset change, collaboration, iterative delivery, and continuous improvement. Real-life case studies, simulations, and exercises are used to build real-world Agile competence.

Course Outline

- Module 1: Introduction to Agile Project Management
- Module 2: Agile Frameworks
- Module 3: Agile Roles & Responsibilities
- Module 4: Agile Planning & Estimation
- Module 5: Agile Delivery & Execution
- Module 6: Stakeholder Engagement in Agile
- Module 7: Monitoring, Metrics & Reporting
- Module 8: Tools for Agile Project Management
