

COBIT ® Training Program Brochure

COBIT ® Training Program Brochure

- Building confidence through strategic IT governance

Audience

In today's digital-driven world, effective IT governance is essential for achieving business objectives, managing risks, and delivering measurable value.

The COBIT® (Control Objectives for Information and Related Technologies) Training Program equips professionals with the globally recognized framework for governing and managing enterprise IT. Participants will learn how to apply COBIT principles to ensure optimal alignment between technology initiatives and organizational goals.

Ideal for:

- IT Managers and Auditors
- Project Managers and Business Analysts
- Risk and Compliance Officers
- CIOs, CTOs, and IT Leaders
- Professionals involved in IT Governance, Assurance, or Strategy

Course Description

The COBIT® Training by Alfred & Victoria Associates Academy provides a structured understanding of the COBIT 2019 framework —covering governance principles, components, and implementation approaches.

Participants will explore how to design and implement a governance system tailored to their organization's goals, regulatory requirements, and stakeholder needs. By the end of this course, you will be able to:

- Explain the key concepts, principles, and structure of COBIT®
- Assess current IT governance maturity levels
- Design governance systems that drive business value
- Support compliance and risk management initiatives

Course Outline

Foundations of IT Governance and COBIT Framework
