This masterclass is designed for experienced professionals who are ready to move beyond managing individual projects into strategic leadership roles.

It is ideal for:

Senior Project Managers

Project Managers

PMO Analysts and PMO Leads

Program Managers

Portfolio Managers

Business Transformation Professionals

Change Management Professionals

Operations and Strategy Managers

Professionals preparing for leadership roles in project governance, PMO, or enterprise transformation

Course Description

The **Project Governance, Portfolio & Transformation Masterclass** is an executive-level training designed to help experienced project professionals transition into strategic leadership roles.

The program equips participants with the knowledge and practical skills to establish effective governance structures, manage project portfolios, build performance dashboards, leverage AI for project management, and lead organization-wide transformation initiatives. Through practical case studies, real-world applications, and expert-led sessions, participants will gain the confidence to make strategic decisions, improve project outcomes, and create greater business value.
