

A large white gear is the central focus, held by several hands belonging to people in business suits. The hands are positioned around the gear, with some holding the outer edges and others supporting it from below. The background is a blurred office setting with a wooden floor.

Six Sigma Yellow Belt Training Brochure

Building Process Excellence Professionals

Improve Processes • Reduce Waste
• Deliver Quality

Audience

In today's competitive business environment, organizations require professionals who understand process improvement, quality management, and continuous improvement principles. The Six Sigma Yellow Belt program equips participants with foundational Six Sigma knowledge to support improvement initiatives within teams and organizations.

Ideal for:

- Entry-level professionals
- Team members in improvement projects
- Operations & administrative staff
- Quality assurance officers
- Business support professionals
- Project team members
- Process improvement teams
- Entrepreneurs and business owners

Course Description

The Six Sigma Yellow Belt Training Program provides participants with a strong foundation in Six Sigma concepts, principles, and tools. Participants learn how to support Green Belts and Black Belts in improvement projects, contribute to data collection, process analysis, and problem-solving initiatives. This program introduces structured problem-solving methodologies using the DMAIC framework (De- fine, Measure, Analyze, Improve, Control).

Course Overview

This training focuses on building awareness and practical understanding of process improvement, quality management, and performance optimization. Participants gain the skills needed to identify inefficiencies, support improvement initiatives, and contribute meaningfully to organizational excellence programs. The program focuses on practical application using real business scenarios, case studies, templates, and simulations.

Course Outline

Module 1: Introduction to Six Sigma

Module 2: Fundamentals of Process Improvement

Module 3: DMAIC Framework

Module 4: Problem-Solving Tools

Module 5: Quality Management Principles

Module 6: Teamwork & Continuous Improvement

Training Details

Duration: 5 days
